

## **FOLDABLE SHELF AND DRAWERS**

### **ABSTRACT OF THE DISCLOSURE**

A shelf includes a main part including a plurality of X-axis parts, Y-axis parts and Z-axis parts so as to form a plurality of partitions, and a plurality of rack members located between two X-axis parts. Each X-axis part has a plurality of grooves. A plurality of connection members is used to connect the X-axis parts and the Z-axis parts, and the X-axis parts and the Y-axis parts are pivotable about the Z-axis parts by the connection members. Each rack member includes X-axis members and Y-axis members. Each Y-axis member has two ends and each end has a fork portion engaging one of the grooves of the X-axis parts. A plurality of drawers is removably received in the partitions.
